

CREATE CUSTOM SPACE

### The Future Of Seating Concepts

Our mission is to create a custom space that translates your vision and enhances your brand through design, engineering, and production.

## Innovative Ideas Stylish Design

### From A to Z

Staffed with full service Interior Design and Design Engineer Departments, SCI is experienced in every stage of the project life cycle: space planning, design development, manufacturing, logistics and installation. We have the functionality and experience to serve as a single source supplier for any project of any size domestically or internationally.

Our ability to serve as one stop shop saves our customers valuable time, money and frustration. We take pride in providing our customers a hassle free experience.

- Custom color matching

#### FIBERGLASS:

- Full service fiberglass
- Custom gel coating
- Onsite mold maker

#### SOLID SERVICE:

- Full service solid surface
- Custom mixing and matching
- Mold making

### Our Process

# 01

#### DISCOVERY

Site surveys, rollout planning, budgeting & brand intake are a few of the steps in our discovery process.

# 02

#### DESIGN

Our NCIDQ accredited design team leads you through interior & space design with 3D designs, finish samples for color & tactile, & value engineering to match use & budget.

# 03

#### PROTOTYPE

Onsite prototyping allows for short cycles to get clients a prototype. Included in this is durability testing & BISMA testing. Our vertical integration allows us to move quickly to production.

# 04

#### FINAL DESIGN

1 location or 100 our project management team will now take the final designs & create a project plan to meet timelines & budget.

# 05

#### PRODUCTION

Our state of the art 200,000 sq feet manufacturing facility outside of Chicago, Illinois creates efficiencies for delivering ontime.

# 06

#### DELIVERY & INSTALLATION

We take responsibility for our design & products getting from us to installed (not just delivered).
